Hi, I am Khalilur Rahman Akand (Woadud). I am from Mymensingh. I have been working as a JavaScript Developer at Sovware (Software Company) since 2019. I spend my full time practically every day, experimenting with JavaScript and its both client-side and server-side framework. I always enjoy challenging works that help me to learn something new.

Work Experience

JavaScript Developer at Sovware
From 2019 to 2021 (Still now)

Sovware is a stable company providing on-demand software creating service. I worked as a key member of its Software development team. My work involves using multiple programming languages such as JavaScript, Typescript, MySQL, HTML, CSS and libraries about those languages.

Front-end Developer at Freelance IT Lab
From 2018 to 2019

Freelance IT Lab is Local area based Software Company Who are Create Software for their local client. I was working on those software as a Front-end Developer and used JavaScript, HTML and CSS and libraries about those languages.

Portfolio

I had created two Web templates with react, two dashboards for ThemeForest, one with react and others with vue js. One web tool for image convert to placeholder with React and Express js. My most Excited and Dream project is an HRM app that is used only for the Sovware office system. I used React for client-side, style-component for style, Ant design as UI library, Electron js for Native Desktop, Express for Server-side, Mysql for database, Sqlite3 for native database, Axios for API handling, Socket.io for Real-time communication.

My projects links and details:

Dashboards:
StrikingDash - React Admin Dashboard Template by SovWare | ThemeForest
StrikingDash - Vue Admin Dashboard Template by SovWare | ThemeForest

Web templetes:
Tejarat - Multipurpose Business & Corporate HTML Template (jsnorm.com)
Direo Template (jsnorm.com)

Regards,

Khalilur Rahman Akand
