## Projects

---

Ebhubon	This is an multivendor ecommerce website, made with NextJs. For layout I have been used react bootstrap, and for custom code, uses css flex-box and grid. This project is made by me in my current company.	<a href="https://www.ebhubon.com/">https://www.ebhubon.com/</a> (Private Repo)
Slack Clone	This is made with React JS. And the backend with firebase.	<a href="https://github.com/meersajib/slack">https://github.com/meersajib/slack</a>
Amazon Clone	This project is made with React JS. This is a clone of amazon.	<a href="https://github.com/meersajib/amazon">https://github.com/meersajib/amazon</a>
Inventory	This is made with React + Bootstrap + SCSS. That was my first react project.	<a href="https://gitlab.com/meersajib/inventory-app">https://gitlab.com/meersajib/inventory-app</a>
Monico	This project was made with react and React Bootstrap only.	
Instagram Clone	This project is made with React JS. This is a clone of amazon.	<a href="https://github.com/meersajib/instagram-clone">https://github.com/meersajib/instagram-clone</a>

## Software
